Dear Mr. Napoles Neto:

It is indeed a pleasure to acknowledge your application for admission to membership in the American Society of Civil Engineers.

The processing of applications takes some time, as references and employers must be contacted and their recommendations received before action can be taken by the several membership committees. After all data have been compiled, the application is presented to the Board of Direction for consideration and ballot. Accordingly, do not be concerned if considerable time elapses before you hear from us again.

It is only by such thorough procedure that ASCE's high standards of membership are maintained. You can be sure, however, that every effort will be made to avoid unnecessary delay.

I hope soon to be privileged to welcome you into Society membership.

Sincerely,
